

## Nautasea Winterizing Checklist

- Clean the boat hull, deck & bilge / remove trash & food
- Change engine oil & oil filter
- Stabilize fuel + run engine to circulate
- Flush cooling system & add marine antifreeze
- Fog engine (if required)
- Drain all water lines (livewells, freshwater tanks, washdowns, AC / raw water)
- Remove or disconnect battery + fully charge / store indoors
- Lubricate hinges, latches, steering components, cables
- Cover boat with heavy-duty marine cover or shrink-wrap + ensure ventilation
- Final check:
  - Engine winterized
  - Antifreeze added
  - Fuel stabilized
  - Battery stored
  - Interior cleaned
  - Cover secured
